Filter to choose each line items and combinations to show further details in numbers and percentage

Select State / Select City / Select School / Grade 1-10 STD / Subjects / Modules /

Percentage of modules completed / subject wise completed pertaining to each school and as a whole

The LMS application will have access to Guests who are outside of schools. Example, there might be a student or parents or any school principal would like to explore our platform.

We do not provide access to all our contents or modules but they register instantly and log in to the application to view particulars resources like promotional videos, data sheet, brochures, common quizzes, paid learning contents, register for demo or register for any live classes or webinars etc

This is a default option already built and Super admin need not create every time. Super admin will have ability to view the guests details in a separate grid.

This guest view to be created in this manor.

If any outside users click the link or download the application.

Window to display registered users or new user.

Click new user by selecting Student, parent, School official, guest

Enter the details based on the option selected user type

Student - ask to fill Full Name, School Name, State, City, Grade, email ID, Phone number

Parents - Full name, Son/Daughter name, School name, State, City, email ID, Phone number

School official - Full name, School Name, State city, email ID and Phone number

Guest - Full Name, Organisation/institute name, State, City, email ID and Phone number

After registering a page opens up to view Welcome video, Common resources, free training videos / Paid videos. General knowledge informations, Quizzes, puzzles, Learning games etc

Will build this in next level considering this works as a learning centre platform in future. (Will re discuss in next phase)
