ThinkPro Academy LMS — Functional Requirements Story

Students

- First login - complete profile

- Access assigned learning content (videos, PDFs, links, etc.).

- Attempt assessments within given time frames.

- View their results and download certificates.

- Access previous years assignments and contents as well.

- No access to the other grades or class resources.

Students will get an a link from school or provided email ID or whats app

First time login to update and reset the password idm system generated
If the login via old method of login ID (unique student it) and password

Update the profile pop us for the first time. Add student profile pic 180 X 180, less than 100kbp
Add profile pic, Grade, Class Section, Role number, parents email ID, Phone number and submit

Once login to view the instructions, message box and dashboard
Dashboard to show all grade relevant resources in multiple icon based
Resources, Video content, assessments, certificate, reports

Resources split in to tabs or we will have a single place to view resources and it's type.
Example: Resource name (Title) Description, Resource type (Video, PDF, excel, video link URL etc)
Videos / Contents - Contents to show all module wise documents, PDF, excel, PPT, word doc etc
Under each modules

Videos - to show in grids 5 videos in each grid can very (similar ti any other LMS platforms)
Under all videos - Video image, video title, module, subject
Filter option - Choose the subject and modules wise
Indication of completed, in progress or completed with check mark or relevant
Videos under specific subject modules to open in orderly manor - sequential under modules
Once they log off and login - system to prompt at the videos left time spot. Example - Module 1 video watched until 12 minutes and log off. Next time they login - it brings back to the same video left at 12th minute to continue

After watching videos there might be a poll to submit. Students can submit the poll and view the answer right or wrong.
If wrong answer - it shows X red mark, if right it shows Green L mark

Assessments:
There would be an assessment assigned by School Mentor on specific dates

Students to get a notification under notification box with message count blue coloured 1 (2) example
BY clicking can read the notification. May be about the start and end date of the assessment

On the day of the start - Click assessment button to start the assessment.

Read the instructions and click on START
Timer will start running depending until 0

One question at a time
Read and submit the right answer and click next
After all questions are completed - click submit to complete the assessment

If time laps and do not click on the submit. System will automatically submits with whatever has been answered until 0 minute.

Situations:

If internet issue - System will pause timer for student to login back
Once login - click resume to continue. Whatever previously answered is saved and continue where that was left

System error - 404 or any other application related error. Mentor to be notified
Mentor can re set the assessment in case of application issue
In this case - the answers submitted partially will be erased and will start as a fresh assessment when school mentor reopens the assessment.

If student answers all questions and final submit button does not work. Student to stay back until the time runs count down to Zero. System automatically submits

View assessment report and certificate under separate tab for students
Click and view the assessment result / grade achieved
Final day to view and download the Certificate from the application

————-

Next year student is promoted from Grade 1 to Grade 2
The previous year resources should also be available as on demand section to view for any references.

Student unique ID created from the system will remain same throughout the journey from Grade 1 to Grade 10
